

## OUR CSR POLICY

*The Domain **La Croix des Champs** is a private establishment open to the public. We have not opened a hotel chain type establishment offering single rooms, but we propose a **unique experience** to our clients by making the estate available to them in its entirety as close as possible to its original dimension. The aim of this project is to **restore** it, with a first phase of bringing it up to ERP accessibility and fire standards, and to keep it in the **family** that built it and has always lived there.*

*We evolve in a **sustainable model**, reinvesting the profits in the maintenance of the house, the improvement of the functioning and in **quality equipment** to meet the expectations of our customers, always in the **respect of the environment**.*

*We strive to think and rethink the organization of the operation of the estate, with an **involved staff**, seeking the best balance between our actions, their impact, and the comfort and **satisfaction** of our customers.*

*In this context, we have established our **sustainable development** charter which is based on an ambitious CSR policy involving the empowerment of staff and customers through awareness of the living environment with associative commitments, limiting waste (sorting-selective, water, zero plastic single use), to an **energy approach** (light, heating/air conditioning reversible heat pump), to **the protection of the environment** (public transport, bicycle, noise pollution, respectful household products) and to the **preservation of the agricultural and wine-growing heritage** of the domain (orchard, farm animals, beehives... ).*

*Our responsible purchasing policy is guaranteed "**short circuit**" thanks to a collaboration with committed **local suppliers** (food industry, household, and bedding...) in a spirit of respectful partnership.*

*We want to include La Croix des Champs in **the local ecosystem** as the domain has always been since its creation.*
